

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1.-21. (Canceled)

22. (Previously Presented) A method for activating and expanding a population of regulatory T cells by simultaneous T cell concentration and cell surface moiety ligation, comprising:

a. contacting a population of cells wherein at least a portion thereof comprises regulatory T cells with a surface, wherein said surface is a surface of a paramagnetic particle and wherein said surface has attached thereto a first agent that ligates a first T cell surface moiety of a regulatory T cell, and the same surface has attached thereto a second agent that ligates a second moiety of said regulatory T cell; and

b. applying a magnetic force that predominantly drives T cell concentration and T cell surface moiety ligation;

thereby inducing activation and expansion of said regulatory T cell.

23. (Previously Presented) The method according to claim 22 wherein the first agent is an anti-CD3 antibody or an antigen-binding fragment thereof and the second agent is an anti-CD28 antibody or an antigen-binding fragment thereof.

24.-29. (Canceled)
